EDUCATION

Chitkara University

Bachelor of Technology in Computer Science & Engineering

- CGPA: 9.0 / 10.0

Chandigarh, India

2022 – 2026

EXPERIENCE

Software Engineer Intern

Silverpush – AdTech Platform

May 2025 – Present

On-site

- Shipped **Zimmer (zimmerhq.ai)**, an AI-powered autonomous marketing SaaS enabling brands to create and manage campaigns across **Google, Meta, and WhatsApp** from a single unified interface.
- Engineered a **drag-and-drop campaign builder** using React, enabling marketers to visually compose campaign components – carousels, FAB messages, and chat bubbles – with zero code, significantly accelerating campaign creation.
- Built an **interactive campaign journey canvas** with React Flow, enabling dynamic, user-action-driven flow visualization where campaigns adapt in real time based on customer behavior.
- Developed an **AI Training module** empowering marketers to train campaign agents with custom datasets, mapping diverse user queries to tailored, brand-specific conversational responses.
- Delivered a **Campaign Playground module** for multi-device, multi-parameter pre-launch testing, reducing deployment risk and improving campaign quality assurance.
- Architected a **theme extraction microservice** using Puppeteer to automate content parsing and semantic theme analysis from live brand websites, enabling zero-manual brand-consistent campaign styling.
- Built **Analytics APIs** aggregating real-time data across Google, Meta, and internal campaign trackers, including reach metrics and LLM token cost management during both campaign creation and live execution.

Frontend Engineer Intern

Cantilever Labs – EdTech Platform

Jun 2023 – Feb 2024

Remote

- Integrated REST APIs in a **React.js + TypeScript + Redux Toolkit + Tailwind CSS** stack, delivering scalable and type-safe frontend modules.
- Identified and resolved critical frontend bugs achieving a **99.9% error reduction rate**, including complex CORS issues from AWS Lambda functions within a browser-based code compiler.
- Built **instructor-side features** including test creation, result calculation, and result editing pages in a separate React.js application, improving overall platform usability and workflow efficiency.
- Developed an in-browser **IDE supporting HTML, CSS, and JavaScript** execution, enabling students to run projects directly on the platform without any local environment setup.
- Integrated an **LSP server (hosted on AWS EC2) with React Monaco Editor**, delivering real-time language intelligence (autocomplete, diagnostics) for in-browser coding tasks.

OPEN SOURCE CONTRIBUTIONS

Ripple TS: Enhanced official **ripple-ts** documentation and optimized **AST Node Tree** structure in the Ripple compiler [#PRs](#).

Rapid7: Contributed to **Rapid7's metasploit-framework** open-source repository, improving documentation clarity and coverage for the widely-used penetration testing framework [#PRs](#).

PROJECTS

Code Fusion | *Next.js, Express.js, MongoDB, Golang, gRPC, Docker, Kubernetes, Nginx, WebSockets* | [GitHub](#)

- Built a cloud-based development environment platform offering on-demand workspaces similar to Replit, supporting C++, Golang, and React.js environments.
- Implemented **microservices architecture** using **gRPC** for efficient, low-latency inter-service communication; orchestrated with Docker and Kubernetes.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: Spring Boot, Django, Node.js, Express.js, Next.js, React.js, React Native, Tailwind CSS

Databases & Data Technologies: DynamoDB, PostgreSQL, MongoDB (sharded), MySQL, Redis, Elasticsearch, Kafka

DevOps & Cloud: Docker, Kubernetes, AWS (ECS, S3, EC2, Lambda, CloudWatch, API Gateway), GitHub Actions, Jenkins, ArgoCD, CI/CD, Google Cloud Platform (GCP), Microsoft Azure

Security & Authentication: JWT, OAuth 2.0, RBAC (Role-Based Access Control), Spring Security

APIs & Integration: REST APIs, Microservices Architecture, Cloudinary, OpenFeign, ThreadLocal, API Gateway

Tools: Postman, Jira, Git, GitLab, Bitbucket, VS Code, IntelliJ, Chrome DevTools, Prometheus, Grafana, OpenTelemetry
