EDUCATION

Chitkara University

Bachelor of Technology in Computer Science & Engineering

– CGPA: 9.0 / 10.0

Chandigarh, India

2022 – 2026

EXPERIENCE

Software Engineer Intern

May 2025 – Present

Silverpush – AdTech Platform

On-site

- Architected scalable backend services using Spring Boot for a drag-and-drop campaign builder, enabling dynamic composition, validation, and persistence of campaign components while significantly improving flexibility and reducing campaign creation time for non-technical users.
- Designed and developed a theme extraction microservice using Spring Boot, integrating Playwright-based web scraping for automated content parsing and semantic theme analysis from live brand websites, enabling scalable and zero-manual brand-consistent campaign styling.
- Engineered RESTful Analytics APIs using Spring Boot to aggregate and process real-time data from Google, Meta, and internal campaign systems, implementing efficient data pipelines for reach metrics and optimized LLM token cost tracking during campaign creation and execution.
- Architected an email delivery microservice using Spring Boot, incorporating asynchronous processing, retry mechanisms, and external SMTP integrations to ensure high-throughput and fault-tolerant delivery of transactional and campaign emails for Zimmer.
- Architected a Stripe-inspired request logging system in Spring Boot, leveraging filters and interceptors to produce a single structured log per request, improving distributed tracing, debugging efficiency, and observability across microservices.

Frontend Engineer Intern

Jun 2023 – Feb 2024

Cantilever Labs – EdTech Platform

Remote

- Identified and resolved critical frontend bugs achieving a 99.9% error reduction rate, including complex CORS issues from AWS Lambda functions within a browser-based code compiler.
- Built instructor-side features including test creation, result calculation, and result editing pages in a separate React.js application, improving overall platform usability and workflow efficiency.
- Developed an in-browser IDE supporting HTML, CSS, and JavaScript execution, enabling students to run projects directly on the platform without any local environment setup.
- Integrated an LSP server hosted on AWS EC2 with React Monaco Editor, delivering real-time language intelligence such as autocomplete and diagnostics for in-browser coding tasks.

PROJECTS

Code Fusion | *Next.js, Express.js, MongoDB, Golang, gRPC, Docker, Kubernetes, Nginx, WebSockets* | [GitHub](#)

- Built a cloud-based development environment platform offering on-demand workspaces similar to Replit, supporting C++, Golang, and React.js environments.
- Implemented microservices architecture using gRPC for efficient and low-latency inter-service communication, orchestrated with Docker and Kubernetes.

BookMyShow Backend | *Spring Boot, MongoDB, MySQL, Redis, Elasticsearch, Spring Batch, OpenFeign* | [GitHub](#)

- Built a scalable movie ticket booking backend system with support for multiple databases including MongoDB and MySQL, handling modular service layers and clean architecture.
- Implemented Redis-based caching and Elasticsearch-powered search to optimize performance and enable efficient querying of movies, shows, and user data.
- Designed a payment provider abstraction using factory pattern supporting integrations like Paytm and PhonePe, enabling extensible and decoupled payment workflows.
- Integrated Spring Batch for background data processing and OpenFeign for inter-service communication in a distributed system setup.

TECHNICAL SKILLS

Programming Languages: Java, C++, Python, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: Spring Boot, Django, Node.js, Express.js, React.js

Databases & Data Technologies: DynamoDB, PostgreSQL, MongoDB (sharded), MySQL, Redis, Elasticsearch, Kafka

DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3, Lambda, CloudWatch, API Gateway), GitHub Actions, Jenkins, ArgoCD, CI/CD, Google Cloud Platform (GCP), Microsoft Azure

Security & Authentication: JWT, OAuth 2.0, RBAC (Role-Based Access Control), Spring Security

APIs & Integration: REST APIs, Microservices Architecture, Cloudinary, OpenFeign, ThreadLocal, API Gateway

Tools: Postman, Jira, Git, GitLab, Bitbucket, VS Code, IntelliJ, Chrome DevTools, Prometheus, Grafana, OpenTelemetry
