EDUCATION

Chitkara University

Bachelor of Technology in Computer Science & Engineering

- CGPA: 9.0 / 10.0

Chandigarh, India

2022 – 2026

EXPERIENCE

Software Engineer Intern

Silverpush – AdTech Platform

May 2025 – Present

On-site

- Shipped **Zimmer (zimmerhq.ai)**, an AI-powered autonomous marketing SaaS enabling brands to create and manage campaigns across **Google, Meta, and WhatsApp** using scalable **Node.js** and **Express-based backend services** for orchestration.
- Engineered a **drag-and-drop campaign builder** using React integrated with **Node.js + Express APIs**, enabling marketers to visually compose campaign components with zero code and faster backend-driven rendering.
- Built an **interactive campaign journey canvas** with React Flow backed by **Express.js APIs and Node.js event-driven architecture** to support dynamic, real-time campaign execution logic.
- Developed an **AI Training module** with **Node.js + Express microservices**, enabling marketers to train agents with datasets and serve optimized conversational responses via backend pipelines.
- Delivered a **Campaign Playground module** leveraging **Node.js, Express, and REST APIs** for multi-device simulation, improving backend validation, testing workflows, and deployment reliability.
- Architected a **theme extraction microservice** using **FastAPI** integrated with **Node.js orchestration layer**, automating semantic parsing and scalable backend processing pipelines.
- Built **Analytics APIs** using **FastAPI and Node.js (Express)** for aggregating real-time campaign data, optimizing API performance, handling LLM token tracking, and ensuring scalable backend observability.

Frontend Engineer Intern

Cantilever Labs – EdTech Platform

Jun 2023 – Feb 2024

Remote

- Integrated REST APIs with **React.js + TypeScript** frontend and **Node.js + Express backend services**, ensuring scalable, type-safe, and maintainable full-stack modules.
- Resolved critical frontend and backend integration bugs including **CORS issues in Express.js APIs** deployed via AWS Lambda, achieving a **99.9% error reduction rate**.
- Built instructor-side features supported by **Node.js + Express REST APIs**, improving backend data flow, test evaluation logic, and result processing efficiency.
- Developed an in-browser IDE backed by **Node.js execution services and Express middleware**, enabling real-time HTML, CSS, and JavaScript execution without local setup.
- Integrated an **LSP server** with React Monaco Editor and **Node.js backend services**, enabling real-time autocomplete, diagnostics, and scalable code intelligence features.

OPEN SOURCE CONTRIBUTIONS

Ripple TS: Enhanced **AST Node Tree** structure and improved compiler performance while contributing to scalable tooling often integrated with **Node.js ecosystems**.

Rapid7: Improved documentation for **metasploit-framework**, strengthening developer usability in backend-heavy security tools and scripting environments.

PROJECTS

Code Fusion | *Next.js, Express.js, Node.js, MongoDB, Golang, gRPC, Docker, Kubernetes*

- Built a cloud-based development platform using **Node.js and Express.js backend services**, enabling on-demand workspaces similar to Replit with scalable API handling.
- Implemented **microservices architecture** with **Node.js, Express, and gRPC**, ensuring efficient inter-service communication and high-performance backend orchestration.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: Node.js, Express.js, Spring Boot, Django, Next.js, React.js, React Native, Tailwind CSS

Databases: DynamoDB, PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch, Kafka

DevOps & Cloud: Docker, Kubernetes, AWS, CI/CD, GitHub Actions, Jenkins

APIs: REST APIs, Microservices Architecture, API Gateway, OpenFeign

Tools: Postman, Git, VS Code, Prometheus, Grafana
